

## Time Tracking

### Fewer Errors

Intelligent clock technology helps eliminate duplicate or missed punches and errors computing total hours and pay.

### Clock Lockout

Limit early clock in, scheduling warns when overtime approaches, managers easily view time cards in real time.

### Eliminate Unplanned Overtime

Restrict unplanned overtime with rules and alerts. Compare budgeted hours to actual worked time in real time.

### Flexible Configuration

Customized pay rules, overtime calculations, compliance requirements and accrual application. Wide range of physical and online clock options.

### Mobile Access

Administrators and employees have convenient access to mobile punch clocks and administration tools from any mobile device.

### Faster Payroll Processing

Fewer errors, instant access for time card review and export to payroll reduces time spent processing payroll.

## TimeWorksPlus.

TimeWorksPlus simplifies time tracking so you can reduce payroll costs, process payroll faster and eliminate errors. Track and manage punches, time cards, time-off requests and accruals. Seamlessly integrates with payroll services.

### TimeWorksPlus Features

- ✓ **Timekeeping** - Captures time data from clocks, calculate multiple rates, accruals, and keeps audit trail.
- ✓ **Geofencing** - Makes it easy to see who showed up at the right place and when. Unlimited geofences allows you to track every location. Mobile clocks simplify compliance.
- ✓ **Filtered Clock Prompts** - Filter clock prompts by employee or group to reduce punch choice, save time and reduce errors.
- ✓ **Overtime Management** - Auto-apply overtime or proactively alert as thresholds approach. Flexible calculations and application.
- ✓ **Payroll Integration** - Easy time card review and approval. Connects time data to payroll processing for fewer errors and faster completion.
